

Dear students,

This document provides you with an overview of all important dates for the application process for studies or internships abroad. Please note that you can spend more than one semester abroad (e.g. one study abroad semester + one internship abroad).

Students should start planning their study abroad semester **at least one year before their stay abroad begins**. (Example: for study abroad semester during summer semester 2027, students need to apply by April 2026).

<sup>1</sup> *Nomination: The Centre for Internationalisation and Languages will inform the partner universities about the selected students by e-mail. This is the nomination process.*

<sup>2</sup> *Students who are selected for a study abroad semester in one of the EU countries will automatically receive Erasmus+ funding (provided applications were submitted on time and sufficient funds are available).*
